

# Federal Programs Lift Latinos Out of Poverty: Spotlight on Nevada\*

For more than 50 years, anti-poverty programs have helped ensure that working families are lifted out of poverty when times are tough or their wages are too low for them to be able to make ends meet. This fact sheet provides evidence of the strong anti-poverty effect of selected supports in Nevada, including the number or share of Nevada Latinos participating and lifted out of poverty.

Latinos<sup>†</sup> represent one in six Americans and are poised to shape the nation's future as one of the fastest-growing segments of the population.<sup>1</sup> In Nevada today, the Hispanic population stands at approximately 800,000, accounting for more than one out of every four people in the state.<sup>2</sup> The Nevada Hispanic community's size, work ethic, and resilience have contributed to the national economic resurgence following the Great Recession.<sup>3</sup> Nevertheless, a considerable portion of Latinos continue to lag behind, struggling to put food on their tables and a roof over their heads. In 2015, about 19% of Latinos in Nevada were living in poverty, compared to 14% of Nevada overall.<sup>4</sup>

For more than 50 years, anti-poverty programs have helped ensure that working

families are lifted out of poverty when times are tough or their wages are too low for them to be able to make ends meet. These programs are collectively known as the "social safety net" and are at risk. The Trump administration's budget request for fiscal year 2018 aims to undermine these programs by imposing unprecedented cuts to fund tax breaks for both corporations and the extremely wealthy on the backs of the most vulnerable members of our communities.<sup>5</sup> Proposed cuts to these programs would have a significant effect on the millions of Latinos who struggle to make ends meet, including the estimated 150,000 Hispanics in Nevada who live in poverty.<sup>6</sup> Using data from the U.S. Census Supplemental Poverty Measure, this fact sheet provides evidence of the strong

\* The data in this report comes from the most recent and complete data sets available. As such, data points and comparison years may vary throughout this report.

† The terms "Hispanic" and "Latino" are used interchangeably by the U.S. Census Bureau and throughout this document to refer to people of Mexican, Puerto Rican, Cuban, Central and South American, Dominican, Spanish, and other Hispanic descent; they may be of any race.

anti-poverty effect of selected supports in Nevada, including the number or share of Nevada Latinos participating and lifted out of poverty.\*

## FEDERAL REFUNDABLE TAX CREDITS

The Earned Income Tax Credit (EITC) and Child Tax Credit (CTC) are federal tax credits for low- and moderate-income workers. The EITC encourages and rewards work—a worker's EITC grows with each additional dollar of earnings until their income qualifies for the maximum value of the credit. The CTC helps working families cover the cost of raising children.

### Earned Income Tax Credit

In tax year 2015, approximately 249,000 tax filers in Nevada received \$616 million worth of tax credits through the EITC, and the latest Census data show that 35% of EITC beneficiaries were Latino.<sup>7</sup>

EITC lifted approximately 43,000 Nevada Latinos out of poverty in 2015.<sup>8</sup>

### Child Tax Credit

In tax year 2014, approximately 217,000 tax filers in Nevada received \$316 million worth of tax credits through the refundable portion of the CTC, and the latest Census data show that 48% of CTC beneficiaries were Latino.<sup>9</sup>

CTC lifted an estimated 21,000 Nevada Latinos out of poverty in 2015.<sup>10</sup>

## FEDERAL ANTI-POVERTY PROGRAMS

Every American family needs an adequate diet, decent home, and stable living environment. Federal programs that provide nutrition assistance, create and preserve affordable housing, and help cover utilities are critical pillars for our nation's social safety net.

### Supplemental Nutrition Assistance Program (SNAP)

In February 2017, approximately 224,000 Nevada households received food assistance through SNAP, and the latest Census data show that 33% of SNAP households were Latino.<sup>11</sup>

SNAP lifted approximately 28,000 Nevada Latinos out of poverty in 2015.<sup>12</sup>

### Rental Assistance

Of the approximately 22,000 Nevada households receiving federal rental assistance in 2016, 3,150 (14%) were Latino households.<sup>13</sup>

Rental assistance lifted approximately 1,000 Nevada Latinos out of poverty in 2015.<sup>14</sup>

### Supplemental Security Income (SSI)

As of December 2016, there were approximately 56,000 Nevadans receiving SSI benefits, and the latest Census data show that 14% of SSI beneficiaries were Latino.<sup>15</sup>

### Temporary Assistance for Needy Families (TANF)

Of the approximately 29,000 Nevadans receiving TANF in FY 2015, 36% were Latino.<sup>16</sup>

### Low Income Home Energy Assistance Program (LIHEAP)

Approximately 25,000 Nevada households received federal help to pay their energy bills in fiscal year 2016.<sup>17</sup>

\* In this analysis, the poverty rate and number of people in poverty is based on the U.S. Census Bureau's Supplemental Poverty Measure (SPM), which extends the official poverty measure by taking into consideration many of the government programs (i.e., tax credits and noncash transfers) designed to assist low-income individuals that are not included in the current official poverty measure. While the Census SPM provides a more complete view of the anti-poverty effect of government transfers than the official measure, the SPM still understates these effects because households in Census surveys, as in many surveys, tend to underreport their income from government programs. For more information about underreporting in the SPM, see Arloc Sherman and Danilo Trisi, "Safety Net More Effective Against Poverty Than Previously Thought," Center on Budget and Policy Priorities, May 6, 2015.
