Data from a statewide survey of 600 registered voters in Arizona, conducted April 23-25, 2019.
Public Opinion Strategies is pleased to present the key findings of a statewide telephone survey in Arizona that was conducted April 23-25, 2019.

The survey was completed among N=600 registered voters and has a margin of error of ± 4.00%.

Nicole McCleskey was the principal researcher on this project. Becky Kramer was the research director and Luke Jackson provided analytical support.
DUAL LANGUAGE EDUCATION
Dual Language Initiative Language

“Please listen carefully as I read you the language of an initiative that might be on the ballot next year.”

A “yes” vote would require public schools to ensure that all English language learners receive the highest quality education, master the English language and access high quality, innovative research-based language programs. School districts and charter schools are also authorized to establish dual-language immersion programs for both native and non-native English speakers.

A “no” vote shall have the effect of retaining the existing law.

“Would you vote YES in favor of the initiative, or NO against it?”
Six out of ten voters support the dual language education measure, with high levels of support across party.
