Methodology
On behalf of UnidosUS, Latino Decisions surveyed 304 Latino voters in Texas, between June 1-14, 2019. The Texas sample has a margin of error of +/- 5.5 percentage points. Surveys were conducted in English or Spanish, according to the respondent’s choice, and were completed using a blended sample that included live telephone interviews on landlines and cell phones, and online surveys. Data were compared to the best-known estimates of the U.S. Census Current Population Survey (CPS) demographic profile of Texas's eligible Latino electorate and weights were applied to bring the data into direct balance with Census estimates for Texas's Latino voter population.
